

Internship Report
Of
Data Science Master Virtual Internship

Submitted

To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of

B.Tech CSE

By

Roll Number of Student: 25SCS1003003067

Name of Student: PALLAVI BORA

Batch: 2025-29

2026-27

Candidate's Declaration

I, Pallavi Bora, do hereby declare that the internship report titled “Data Science Master Virtual Internship” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering.

All the references have been duly quoted, and I have not made use of any material from any other source without acknowledgement. I affirm that this report is my own original work and has not been submitted to any other institute for any degree or diploma requirement. I shall be solely responsible for any kind of copyright violation in this regard.

Pallavi Bora

Roll No.: 25SCS1003003067

**Originality
Affirmed**

This report represents independent work
completed under the AICTE–EduSkills virtual
internship framework.

Acknowledgement

I am using this opportunity to express my gratitude to everyone who supported me throughout the internship program. I am thankful for their aspiring guidance, invaluable constructive criticism, and friendly advice extended to me during this work.

I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work. I would also like to express my heartfelt gratitude to my parents for their blessings and continued support.

Pallavi Bora

Roll No.: 25SCS1003003067

Internship Completion Certificate

The internship completion certificate issued jointly by AICTE, EduSkills, and Siemens records successful completion of the Data Science Master Virtual Internship from June 2026 to August 2026, with an overall grade of E (Excellent).

Introduction

This report summarises the Data Science Master Virtual Internship, undertaken under the AICTE–EduSkills National Internship Portal initiative and supported by Siemens Industry Software (India) Pvt. Ltd. Completed over an 8-week duration (June–August 2026) alongside the B.Tech CSE programme at IILM University, the internship combined structured weekly modules, practical assessments, and a project-based approach to bridge the gap between academic learning and industry practice — using the RapidMiner AI Hub and associated Siemens data science tools.

**Delivery mode**

Fully virtual, self-paced

**Duration**

8 weeks, June – Aug 2026

**Platform**

RapidMiner AI Hub

Goal of the internship

Bridge academic learning with real-world data engineering, machine learning, and platform administration practice.

Organization Profile

Siemens Industry Software

Global leader in industrial software and digital transformation; provides the RapidMiner platform and domain expertise.

EduSkills Foundation

AICTE-recognised skilling partner; responsible for curriculum design, learner assessment, and credential issuance.

AICTE National Internship Portal

Ministry of Education initiative connecting students nationwide with structured virtual internship opportunities.

Problem Statement

Organisations today generate large volumes of data but often lack skilled professionals capable of transforming this data into actionable business insight using structured, repeatable machine learning workflows.

The internship addressed this gap by developing practical competencies to identify suitable business problems for AI/ML, access and prepare data, build and evaluate machine learning models, and deploy and administer these models on an enterprise-grade platform — skills directly transferable to real industry data science roles.

Core gap addressed

Data volume → skilled talent → actionable, repeatable ML workflows

Project Objectives

Frame business problems as data science and ML use cases.

Access, load, transform, and calculate data using industry tools.

Build foundational and advanced machine learning models.

Master advanced data preparation and automation techniques.

Deploy, monitor, and maintain ML models in production-like settings.

Configure and administer the RapidMiner AI Hub platform.

Scope of the Project

The scope of this internship was limited to the structured, week-wise virtual curriculum defined by Siemens and EduSkills under the “Data Science Master” track — covering the complete lifecycle of a data science project.

Note: the internship focused on guided modules, weekly assessments, and a final assessment test using simulated business scenarios — it did not involve deployment on a live external client project.

Technologies & Tools Used

RapidMiner Studio & AI Hub

Data preparation, model building, and platform administration.

Data Engineering Tools

Accessing, loading, and transforming structured and unstructured data.

Machine Learning Algorithms

Classification, regression, and clustering across professional and master modules.

AICTE EduSkills Portal

Weekly assessments, documentation submission, and credential evaluation.

System Architecture

The learning environment followed a typical enterprise data science pipeline across four architectural layers:

**01**

Data Access & Ingestion

Connecting to and loading raw data sources.

**02**

Data Preparation

Cleaning, transforming, and enriching data.

**03**

Modeling

Training, validating, and tuning ML algorithms.

**04**

Deployment & Administration

Publishing, monitoring, and managing models via RapidMiner AI Hub.

Methodology — Week-wise Structure

Week	Module	Focus
1	Applications & Use Cases – Professional	Identifying business problems suitable for AI/ML
2	Data Engineering – Professional	Accessing, loading, transforming, and calculating data
3	Machine Learning – Professional	Building foundational machine learning skills
4	Data Preparation – Master	Advanced data handling and automation
5	Machine Learning – Master	Advanced machine learning techniques
6	Applications & Use Cases – Master	Deploying and monitoring ML models
7	Platform Administration – Master	Configuring and managing RapidMiner AI Hub
8	Platform Administration – Master	Enterprise-level platform operations

Expected Outcomes

Developed a strong conceptual understanding of the end-to-end data science and machine learning workflow.

Gained practical, hands-on skills in data engineering, model building, and model deployment using RapidMiner.

Acquired platform administration skills necessary for managing enterprise AI/ML solutions.

Successfully completed all weekly assessments and the Final Assessment Test, earning the Virtual Internship Certificate.

Strengthened employability and confidence in applying data science concepts to real-world business problems.
